

### **Katrina's Impact: Supply Chains Need to Adapt**

Watching supply chains react to the tragedy of Katrina, the role of planning became crystal clear. Some of the larger retail companies were able to deliver emergency supplies at a quicker pace than the federal government.

Watching supply chains react to the tragedy of Katrina, the role of planning became crystal clear. Some of the larger retail companies were able to deliver emergency supplies at a quicker pace than the federal government. And the planning extended to make sure that stores had the necessary items to help in the clean-up phase. Communications, healthcare, logistics and consumer goods companies all quickly rose to the occasion and used processes in place to move goods to where they were needed. Disaster relief programs become operational and were successful.

In analyzing the next six months in terms of supply chain capabilities, AMR Research's Lora Cecere predicts that supply chain executives will use "advanced planning and scheduling and sourcing technologies to prevent shortages and better serve customers." She suggests some ways that companies can strengthen their supply chains.
