

The Central Nervous System Handout

As you work your way through the central nervous system presentation, answer the following questions to help you collect the relevant information.

| 1. | What are the two components of the central nervous system (CNS)? |
|----|--|
| 2. | What is the function of the meninges? What are the three layers it is comprised of? |
| | |
| 3. | What function does the cerebral spinal fluid (CSF) have? |
| 4. | What are the grey and white matter of the spinal cord made of? |
| 5. | List and describe the steps involved in signal transmission between the PNS and CNS. |
| | |
| | |

| 6. | During embryonic stages, what are the three segments of the brain called? |
|----|---|
| 7. | What does the cerebrum develop from? Describe the properties and functions of the cerebrum. |
| 8. | What two parts of the brain does the hindbrain develop into? Describe the functions of each. |
| 9. | What are the 3 components of the brainstem? |
| 10 | . What is the function of the blood-brain barrier? What are some things that are able to pass through the BBB? |
| 11 | . Which part of the brain most likely evolved first: the brain stem or the cerebellum? Explain your reasoning. |
